Council for Geoscience: Internships 2025 | 2026 New Application

Description

Council for Geoscience invites applications for internship opportunities across various departments. This internship program offers students and recent graduates the chance to gain practical experience, develop professional skills, and contribute to impactful geoscientific projects. Interns will work closely with experienced professionals, participate in research activities, and assist in the execution of projects aimed at addressing critical challenges in geoscience and related fields.

Responsibilities

- **Assist in Research Projects:** Collaborate with CGS researchers and scientists on ongoing projects related to geology, geochemistry, geophysics, hydrology, or environmental science.
- **Data Collection and Analysis:** Collect field data, conduct laboratory analyses, and utilize software tools for data processing and interpretation.
- **Report Writing:** Prepare reports, presentations, and technical documents summarizing research findings, observations, and recommendations.
- **Mapping and Surveying:** Support mapping and surveying activities, including field mapping, GIS analysis, and remote sensing.
- **Project Support:** Provide administrative and logistical support for project planning, implementation, and monitoring.
- **Knowledge Sharing:** Contribute to knowledge sharing initiatives within CGS and with external stakeholders through presentations, seminars, and workshops.

Qualifications

- **Education:** Currently enrolled in or recently graduated from a Bachelor's, Honours, or Master's degree program in Geology, Earth Sciences, Environmental Science, Geography, or related fields.
- **Technical Skills:** Basic understanding of geoscientific principles and methodologies. Proficiency in GIS software (e.g., ArcGIS, QGIS) and Microsoft Office Suite.
- **Analytical Skills:** Ability to collect, analyze, and interpret geoscientific data accurately.
- **Communication:** Strong written and verbal communication skills. Ability to convey technical information clearly and effectively.
- **Teamwork:** Excellent interpersonal skills and the ability to work collaboratively in a multidisciplinary team environment.
- **Initiative:** Proactive approach to learning, problem-solving, and taking initiative in project tasks.

Job Benefits

- **Hands-on Experience:** Gain practical experience in geoscience research, mapping, and project management.
- **Professional Development:** Access training opportunities, mentorship,
